Subject: Massachusetts NPDES permit MA0003590 - Updates & Information Request

Dear Mr. Kosian,

I hope you're well.

A quick update regarding MBTA and Keolis' NPDES permit MA0003590: the permit is still in development and no meetings with the current permit's co-permittees have been scheduled at this point. I will let you know as soon as that changes and I apologize for the inconvenience any delays may have caused.

I do have a request in the meantime, however. For informational purposes, if you could:

- 1) identify any stormwater or other wastewater outfalls from NorthPoint property that discharge either to
 - a. the Millers River and/or
 - b. the Charles River

on a map of the local area or with appropriate coordinates, and

- 2) provide any information (preferably permit IDs) for past, current, or future NPDES or other water quality permit coverage for these outfalls,

that would be very helpful. MBTA and/or Keolis may ask you for similar information prior to June of this year.

Please let me know if you have any questions or would like more information about the context of this request.

Thanks,

Undine Kipka
